ILLINOIS JOURNAL OF MATHEMATICS

Contents of Volume 47 (2003)

David R. Adams, Ritva Hurri-Syrjänen, Besov functions and vanishing exponential integrability 1137

B. P. Allahverdiev, Extensions, dilations and functional models of discrete Dirac operators 831

Michael Aschbacher, A 2-local characterization of M_{12} 31

Michael R. Bacon, Luise-Charlotte Kappe, On capable p-groups of nilpotency class two 49

A. Ballester-Bolinches, J. C. Beidleman, H. Heineken, Groups in which Sylow subgroups and subnormal subgroups permute 63

William D. Banks, Asma Harcharras, New examples of noncommutative $\Lambda(p)$ sets 1063

Frédéric Bayart, Compact composition operators on a Hilbert space of Dirichlet series 725

J. C. Beidleman, A. Ballester-Bolinches, H. Heineken, Groups in which Sylow subgroups and subnormal subgroups permute 63

Jürgen Berndt, Lieven Vanhecke, László Verhóczki, Harmonic and minimal unit vector fields on Riemannian symmetric spaces 1273

Christopher J. Bishop, Big deformations near infinity 977

Indranil Biswas, Equivariant vector bundles over the upper half plane 619

Oscar Blasco, Francisco Villarroya, Transference of bilinear multiplier operators on Lorentz spaces 1327

Frauke M. Bleher, Ted Chinburg, Deformations with respect to an algebraic group 899

Aldir Brasil Jr., A. Gervasio Colares, Oscar Palmas, Complete spacelike hypersurfaces with constant mean curvature in the de Sitter space: A gap theorem 847

Markus Brodmann, Castelnuovo-Mumford regularity and degrees of generators of graded submodules 749

Qingying Bu, Joe Diestel, Patrick Dowling, Eve Oja, Types of Radon-Nikodym properties for the projective tensor product of Banach spaces 1303

B. Cascales, R. Shvydkoy, On the Krein-Šmulian theorem for weaker topologies 957

P. J. Catuogno, S. E. Ferrando, A. L. Gonzalez, Lower bounds for generalized upcrossings of ergodic averages 633

Zoé Chatzidakis, Ehud Hrushovski, Asymptotic theories of differential fields 593

N. S. Chernikov, On Baer's problem and properties of M''-groups 71

Ted Chinburg, Frauke M. Bleher, Deformations with respect to an algebraic group 899

Guy Cohen, Michael Lin, Laws of large numbers with rates and the one-sided ergodic Hilbert transform 997

P. M. Cohn, A remark on the quasi-inverse of a product 87

A. Gervasio Colares, Aldir Brasil Jr., Oscar Palmas, Complete spacelike hypersurfaces with constant mean curvature in the de Sitter space: A gap theorem 847

John Cossey, Stewart E. Stonehewer, The embedding of a cyclic permutable subgroup in a finite group 89

M. Costantini, G. Zacher, On the structure of the group of autoprojectivities of a locally finite modular p-group of finite exponent 113

Dean Crnković, Dieter Held, Some Menon designs having U(3,3) as an automorphism group 129

Giovanni Cutolo, Howard Smith, James Wiegold, **p**-groups of maximal class as automorphism groups 141

Benoît Daniel, Flux for Bryant surfaces and applications to embedded ends of finite total curvature 667

Joe Diestel, Qingying Bu, Patrick Dowling, Eve Oja, Types of Radon-Nikodym properties for the projective tensor product of Banach spaces 1303

Nguyen Quang Dieu, Le Mau Hai, Some remarks about Reinhardt domains in $\mathbf{C}^n$ 699

Martyn R. Dixon, L. A. Kurdachenko, Groups with the maximal condition on non FC-subgroups 157

Patrick Dowling, Qingying Bu, Joe Diestel, Eve Oja, Types of Radon-Nikodym properties for the projective tensor product of Banach spaces 1303

Paul C. Eklof, Saharon Shelah, On the existence of precovers 173

M. De Falco, F. de Giovanni, C. Musella, Y. P. Sysak, Periodic groups with nearly modular subgroup lattice 189

Gero Fendler, Simplicity of the reduced C^*-algebras of certain Coxeter Groups 883

S. E. Ferrando, P. J. Catuogno, A. L. Gonzalez, Lower bounds for generalized upcrossings of ergodic averages 633

L. Fuchs, Reinhold Baer and his influence on the theory of abelian groups 207

Stephen J. Gardiner, Jordi Pau, Approximation on the boundary and sets of determination for harmonic functions 1115

Henri Gillet, Daniel R. Grayson, Erratum to "The loop space of the Q-construction" 745

F. de Giovanni, M. De Falco, C. Musella, Y. P. Sysak, Periodic groups with nearly modular subgroup lattice 189

R. Göbel, S. Shelah, S. L. Wallutis, On universal and epi-universal locally nilpotent groups 223

A. L. Gonzalez, S. E. Ferrando, P. J. Catuogno, Lower bounds for generalized upcrossings of ergodic averages 633

Ana Granados, A comparison theorem on simply connected complete Riemannian manifolds 1167

Daniel R. Grayson, Henri Gillet, Erratum to "The loop space of the Q-construction" 745

Luigi Greco, Tadeusz Iwaniec, Uma Subramanian, Another approach to biting convergence of Jacobians 815

Phillip Griffith, The Baer splitting problem in the twentyfirst century 237

K. W. Gruenberg, Reinhold Baer 1

K. W. Gruenberg, The higher cohomology groups and extension theory 251

Matthias Grüninger, Peter Schmid, Groups of central type and Schur multipliers with large exponent 265

C. K. Gupta, Alexei Krasilnikov, The finite basis question for varieties of groups—some recent results 273

Le Mau Hai, Nguyen Quang Dieu, Some remarks about Reinhardt domains in $\mathbf{C}^n$ 699

Asma Harcharras, William D. Banks, New examples of noncommutative $\Lambda(p)$ sets 1063

P. Hauck, A. Martínez-Pastor, M. D. Pérez-Ramos, Products of $\mathcal{N}$-connected groups 1033

H. Heineken, A. Ballester-Bolinches, J. C. Beidleman, Groups in which Sylow subgroups and subnormal subgroups permute 63

Dieter Held, Dean Crnković, Some Menon designs having U(3,3) as an automorphism group 129

David A. Herron, Pekka Koskela, Mappings of finite distortion: gauge dimension of generalized quasicircles 1243

Jürgen Herzog, Yukihide Takayama, Approximations of generalized Cohen-Macaulay modules 1287

Paul Hill, Charles Megibben, Baer's extension equivalence 285

Steve Hofmann, John Lewis, Marius Mitrea, Spectral properties of parabolic layer potentials and transmission boundary problems in nonsmooth domains 1345

Ehud Hrushovski, Zoé Chatzidakis, Asymptotic theories of differential fields 593

Ritva Hurri-Syrjänen, David R. Adams, Besov functions and vanishing exponential integrability 1137

Hideaki Ishikawa, Kohji Matsumoto, On the estimation of the order of Euler-Zagier multiple zeta-functions 1151

S. V. Ivanov, On subgroups of free Burnside groups of large odd exponent 299

Tadeusz Iwaniec, Luigi Greco, Uma Subramanian, Another approach to biting convergence of Jacobians 815

William C. Jagy, Irving Kaplansky, Indefinite binary quadratic forms with Markov ratio exceeding 9 305

B. Jiang, Uniform approximation on Riemann surfaces by holomorphic and harmonic functions 1099

Irving Kaplansky, William C. Jagy, Indefinite binary quadratic forms with Markov ratio exceeding 9 305

Luise-Charlotte Kappe, Michael R. Bacon, On capable p-groups of nilpotency class two 49

Wolfgang P. Kappe, Some subgroups defined by identities 317

Guy Katriel, Solution to Rubel's question about differentially algebraic dependence on initial values 1261

Masato Kikuchi, Characterization of Banach function spaces that preserve the Burkholder square-function inequality 867

Pekka Koskela, David A. Herron, Mappings of finite distortion: gauge dimension of generalized quasicircles 1243

L. G. Kovács, A non-extendable abstract kernel 327

Alexei Krasilnikov, C. K. Gupta, The finite basis question for varieties of groups—some recent results 273

L. A. Kurdachenko, Martyn R. Dixon, Groups with the maximal condition on non FC-subgroups 157

L. A. Kurdachenko, J. Otal, I. Ya. Subbotin, Baer–like decompositions of modules 329

Gitta Kutyniok, A weak qualitative uncertainty principle for compact groups 709

Urszula Ledzewicz, Heinz Schättler, Stanislaw Walczak, Optimal control systems governed by second-order ODEs with Dirichlet boundary data and variable parameters 1189

Felix Leinen, Orazio Puglisi, Diagonal limits of finite alternating groups: confined subgroups, ideals, and positive definite functions 345

Wolfgang Lempken, 2-local amalgams for the simple groups $GL(5,2)$, M_{24} and He 361

John Lewis, Steve Hofmann, Marius Mitrea, Spectral properties of parabolic layer potentials and transmission boundary problems in nonsmooth domains 1345

Ronaldo F. de Lima, On surfaces with constant mean curvature in hyperbolic space 1079

Chen Lin, Mingxue Liu, Richness of invariant subspace lattices for a class of operators 581

Huaxin Lin, Hiroyuki Osaka, Tracially quasidiagonal extensions and topological stable rank 921

Michael Lin, Guy Cohen, Laws of large numbers with rates and the one-sided ergodic Hilbert transform 997

Mingxue Liu, Chen Lin, Richness of invariant subspace lattices for a class of operators 581

Jeremy Lovejoy, More lacunary partition functions 769

A. Lucchini, F. Menegazzo, M. Morigi, On the existence of a complement for a finite simple group in its automorphism group 395

A. Martínez-Pastor, P. Hauck, M. D. Pérez-Ramos, Products of $\mathcal{N}$-connected groups 1033
